# **Franklin International**

## **Safety Data Sheet**

**Titebond III Ultimate Wood Glue** 

Section 1. Identification				
1.1 Product identifier				
GHS product identifier	: Titebond III Ultimate Wood Glue			
Physical state : Liquid.				
Address	: Franklin International 2020 Bruck Street Columbus Ohio 43207			
Contact person	: Franklin Technical Services			
Telephone         : (800) 877-4583				
In case of emergency : (614) 445-1300				
e-mail address of person responsible for this SDS	: SDS@FranklinInternational.com			
Reference number	: 6192			
Product code	: 1413			
Date of revision	: 01,11,2023			
Chemtrec Australia	: +(61) - 290372994			
Chemtrec International	: (703) 527 - 3887			
Chemical family	: Adhesive.			
1.2 Relevant identified uses	of the substance or mixture and uses advised against			
Relevant identified uses of	the substance or mixture and uses advised against			
Identified uses				
Wide dispersive use of substances in professional and DIY adhesives. Industrial use wood glue.				
Uses advised against				
Not applicable.				
1.3 Details of the supplier of	the safety data sheet			
Supplier's details	: Woodbond Adhesives 6 Mount Barker Road Totness South Australia 5250 Australia Phone: 1300-133-439			
Emergency telephone number (with hours of operation)	: (61)-290372994 (24 hrs)			
Section 2. Hazard	s identification			
Classification of the substance or mixture	: Not classified.			
GHS label elements				
Signal word : No signal word.				
Hazard statements	: No known significant effects or critical hazards.			
Precautionary statements				

Prevention	Not applicable.
Response	: Not applicable.

### Section 2. Hazards identification

Storage	1	Not applicable.
Disposal	:	Not applicable.
Supplemental label elements	:	Not applicable.
Other hazards which do not result in classification	:	None known.

### Section 3. Composition/information on ingredients

Substance/mixture	: Mixture
Other means of	: Not available.
identification	

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

The total concentration of ingredients in this product, reported or not in this section, is 100%.

### Section 4. First aid measures

#### Description of necessary first aid measures Eye contact : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs. Inhalation : Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if needed. Skin contact Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if needed. Ingestion : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if needed. Most important symptoms/effects, acute and delayed Potential acute health effects Eye contact : This product may irritate eyes upon contact. Inhalation : No known significant effects or critical hazards. Skin contact : No known significant effects or critical hazards. Ingestion : No known significant effects or critical hazards. Over-exposure signs/symptoms Eye contact : No specific data. Inhalation : No specific data. Skin contact : No specific data. Ingestion : No specific data. Indication of immediate medical attention and special treatment needed, if necessary Notes to physician : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. **Specific treatments** 2 No specific treatment. **Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

Extinguishing media	
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: None known.
Specific hazards arising from the chemical	: In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide metal oxide/oxides
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures					
For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.			
For emergency responders	:	If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".			
Environmental precautions	:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).			
Methods and materials for co	ont	ainment and cleaning up			
Small spill	:	Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.			
Large spill	:	Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.			

### Section 7. Handling and storage

Precautions for safe handling	
Protective measures	: Put on appropriate personal protective equipment (see Section 8).
Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

### Section 7. Handling and storage

Conditions for safe storage,	: Store between the following temperatures: 4.4444 to 32.222°C (40 to 90°F). Store			
including any	in accordance with local regulations. Store in original container protected from			
incompatibilities	direct sunlight in a dry, cool and well-ventilated area, away from incompatible			
	materials (see Section 10) and food and drink. Keep container tightly closed and			
	sealed until ready for use. Containers that have been opened must be carefully			
	resealed and kept upright to prevent leakage. Do not store in unlabeled containers.			
	Use appropriate containment to avoid environmental contamination. See Section 10			
	for incompatible materials before handling or use.			

### Section 8. Exposure controls/personal protection

<u>Control parameters</u> <u>Occupational exposure limi</u> None.	<u>ts</u>	
Biological exposure indices No exposure indices known.		
Appropriate engineering controls	:	Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Environmental exposure controls	:	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
Individual protection measur	es	
Hygiene measures	:	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	:	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.
Skin protection		
Hand protection	:	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
Body protection	:	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	:	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	:	A respirator is not needed under normal and intended conditions of product use. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

### Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

Appearance	
Physical state	: Liquid.
Color	: Brown. [Light]
Odor	: Characteristic. [Slight]
Odor threshold	: Not available.

### Section 9. Physical and chemical properties

	Vapor Pressure at 20°C	Vapor pressure at 50°C			
Vapor pressure	:				
Volatility	: 48% (w/w)				
VOC (less water, less exempt solvents)	: 0.0105 g/l				
Lower and upper explosion limit/flammability limit	: Not available.				
Flammability	: Not available.				
Evaporation rate	: <1 (butyl acetate = 1)				
Flash point	: Closed cup: >93.333°C (>200°F) [Setaflash] [Product does not sustain combustion				
Boiling point, initial boiling point, and boiling range	98.889°C (210°F)				
Melting point/freezing point	: Not available.				
рН	: 2.5 to 3.5

Solubility in water	: Not	t available.		
Partition coefficient: n- octanol/water	: Not	t applicable.		
Auto-ignition temperature	: Not	t applicable.		
Decomposition temperature	: Not	t available.		
Viscosity	: Not	t available.		

### Section 10. Stability and reactivity

: No specific test data related to reactivity available for this product or its ingredients.
: The product is stable.
: Under normal conditions of storage and use, hazardous reactions will not occur.
: No specific data.
: No specific data.
: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

### Section 11. Toxicological information

#### Information on toxicological effects

#### **Acute toxicity**

Not available.

#### Irritation/Corrosion

Not available.

#### **Sensitization**

Not available.

#### **Mutagenicity**

### Section 11. Toxicological information

#### Not available.

**Carcinogenicity** 

Not available.

**Reproductive toxicity** 

Not available.

#### **Teratogenicity**

Not available.

#### Specific target organ toxicity (single exposure)

Not available.

#### Specific target organ toxicity (repeated exposure)

Not available.

#### **Aspiration hazard**

Not available.

Information on the likely	: Routes of entry not anticipated: Oral, Dermal, Inhalation, Eyes.
routes of exposure	

#### Potential acute health effects

r oteritiar adate ricatti cricoto		
Eye contact	:	This product may irritate eyes upon contact.
Inhalation	:	No known significant effects or critical hazards.
Skin contact	:	No known significant effects or critical hazards.
Ingestion	:	No known significant effects or critical hazards.
Symptoms related to the physical	sic	al, chemical and toxicological characteristics
Eye contact	:	No specific data.
Inhalation	:	No specific data.
Skin contact	:	No specific data.
Ingestion	:	No specific data.
Delayed and immediate effect	S	and also chronic effects from short and long term exposure
Short term exposure		
Potential immediate effects	:	Not available.
Potential delayed effects	:	Not available.
Long term exposure		
Potential immediate effects	:	Not available.
Potential delayed effects	:	Not available.
Potential chronic health effe	<u>ct</u>	<u>s</u>
Not available.		
General	:	No known significant effects or critical hazards.
Carcinogenicity	:	No known significant effects or critical hazards.
Mutagenicity	:	No known significant effects or critical hazards.
Reproductive toxicity	:	No known significant effects or critical hazards.
Numerical measures of toxici	ty	
Acute toxicity estimates		
N/A		

### Section 12. Ecological information

#### **Toxicity**

Not available.

#### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

Not available.

<u>Mobility in soil</u>	
Soil/water partition coefficient (Koc)	: Not available.
Other adverse effects	: No known significant effects or critical hazards.

### Section 13. Disposal considerations

Disposal methods

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information

	-					
	DOT Classification	TDG Classification	Mexico Classification	ADR/RID	IMDG	IATA
UN number	Not regulated.	Not regulated.	Not regulated.	Not regulated.	Not regulated.	Not regulated.
